

MEMORANDUM OF UNDERSTANDING (MoU)

BETWEEN

OLEWIN PRIVATE LIMITED - INDIA

(Represented by Mr. Bandaru Mahesh - Director)

AND

_____**COLLEGE/INSTITUTE / UNIVERSITY**

(Represented by its Chairman)

1. **Purpose:** Establish a long-term, industry-integrated Center of Excellence in collaboration with Olewin Group - India as a Technology Company, creating a campus-based Ecosystem for R&D, DeepTech, Skill Development, Real-Time Industry Projects and Product Development, where students and faculty learn and work through actual technology projects and professional industry practices.
2. **Campus Company Model:** Corporate-style Technology and R&D environment within the campus, operating **R&DaS/SaaS/PaaS/IaaS** with company-like teams, project roles, professional workflows, SkillExion dashboards, real-time project assignments, faculty mentoring, technical experts and progressive technology infrastructure, enabling students to experience the complete working environment of a Real DeepTech company from learning and research to development, testing, deployment and product launching.
3. **Faculty Development Program (FDP):** Olewin shall conduct continuous faculty development programs from the Director/Research Scientists covering emerging technologies, industry practices, R&D methodologies, book Publications, product development and project-based teaching to selected professors and teaching staff.
4. **Ecosystem:** Providing every UG and PG student with an individual SkillExion Dashboard credentials for learning, project assignment, task tracking, performance, certification, project records, Industry internships (Paid/Unpaid) and career development.
5. **Real Product & Industry Project Assignment:** Assign students through the SkillExion platform to real Olewin company/industry, software, hardware R&D, DeepTech and technology projects based on their branch, skills and development level, providing practical experience beyond classroom training and demonstration projects.
6. **Year-Wise Student Pathway:** 1st Year – Foundation → 2nd Year – Industry Exposure → 3rd Year – Advanced Project Development & Internship → Final Year – Real-Time Company Project Development with placement preparation and job assistant.
7. **Technology Domains:** Photonic, Quantum, AI/ML, Robotics, SpaceTech, Satellic-Drones, Semiconductor, IoT, Cybersecurity, EnergySector, Multi-Cloud, Blockchain and other emerging DeepTech domains.
8. **Institutional Support:** Provide dedicated CoE space with electricity, internet, AC, furniture, work areas, cabins and essential facilities for Product development, training and practical product ecosystem.
9. **MoU-to-Activation Process:** After MoU execution, Olewin initiates student registration and program implementation, followed by technology deployment and CoE/ Campus-company model activation.
10. **Program Enrollment & Fees:** Following CoE activation, students shall complete **annual CoE registration, payable once per academic year at ₹1,500/-**, and shall thereafter be enrolled in applicable industry programs across their academic years. Program fees shall generally range from **₹9,500/- to ₹12,500/- per student**, depending on the program, duration, technology domain, learning resources, practical project components and certification

requirements. The programs shall cover structured Skill Development, R&D, DeepTech, Real-Time Industry Projects, Product Development and Emerging Technologies, Placement training and career support for both Private sector and Govt Jobs - Nationwide.

11. **Three-Month Functionalization:** Olewin will work to bring the CoE into functional operation within **(3) three months of MoU execution**, subject to required institutional space, utilities, approvals and readiness.
12. **Olewin Company Support:** Invest in technology infrastructure, GPUs, computing systems, R&D equipment, software and industry resources. **(Zero CapX Model for institutions where 100% Investment from Olewin Pvt Ltd Company / Research Foundation).**
13. **Phased Investment:** Olewin will progressively establish and expand the campus-based Technology Company and CoE Ecosystem through phased investments of **₹15 Lakhs, ₹20 Lakhs, ₹30 Lakhs, ₹50 Lakhs and, where required, up to ₹1 Crore**, based on evolving technology, R&D, DeepTech, infrastructure, product-development and project requirements.
14. **Academic Project Integration:** Approved company/CoE projects may be aligned with academic project requirements, connecting academic work directly with real-world product development.
15. **Student-to-Professional Pathway:** Students progress from basic learning to team projects, advanced development, R&D, product engineering, internships and professional project responsibilities.
16. **Institutional Infrastructure:** Provide dedicated, secure classroom, laboratory, and CoE space of - 2000 - 3500 Sq.ft. Nominate a CoE Coordinator, who shall be the Institution's primary point of contact for day-to-day CoE operations. Provide all necessary institutional, statutory, and regulatory approvals required to operate the CoE on campus.
17. **Product Demonstration & Launch:** Completed and approved products developed through the ecosystem may be demonstrated, deployed or commercially launched through appropriate Olewin and Institution channels.
18. **Project-Driven Infrastructure:** Hardware, GPUs, computing, R&D equipment and DeepTech infrastructure will be deployed according to actual student projects, R&D activities and future technology requirements.
19. **Term & Governance:** Operate under a 9-year MoU with joint governance, phased implementation, periodic review and dispute-resolution provisions.
20. **Intellectual Property:** Olewin proprietary technology and Olewin-led CoE R&D/product outputs shall remain Olewin property unless otherwise agreed in writing.

Engineering Programs

Academic Year

Development Stage

What Students Receive

1st Year: 2030–2031 R&D & DeepTech Exploration • Future Product Research • Innovation Projects • International Research Exposure

2nd Year: 2029–2030 Emerging Technology Projects • Advanced Skill Development • Team-Based Product Building • Industry Practices

3rd Year: 2028–2029 Advanced Product Engineering • **1-Year to 18 Months Industry Internship** • R&D Participation • Professional Project Experience

Final Year: 2027–2028 **Real-Time Company Product Development** • **Up to 1 Year Industry Internship** • with paid/unpaid Stipend for selected students, academic Project Integration • Placement & Career Pipeline.

Non-Engineering Programs

For **BSc, BCom, BBA, BBM, BCA, MCA, MBA, MCom** and other non-engineering programs, the pathway can be positioned around technology-enabled business, analytics, digital operations, entrepreneurship, product management, finance, and industry projects rather than engineering-heavy DeepTech.

1st Year: Digital & Technology Foundation • AI Tools • Data & Business Skills • Research & Innovation Exposure

2nd Year: Industry Applications • Business/Domain Projects • AI & Analytics • Team-Based Product & Operations Development

3rd Year: Advanced Industry Projects • **1-Year to 15/18 months Internship Opportunity** • Research/Business Analytics • Professional Skill Development

Final Year: Real-Time Company Projects • **Up to 1-year Internship Opportunity** • Product/Business Development • Placement & Entrepreneurship Pipeline.
